## Anser U2 Features:

### Printer

1. 4-in-1 compact design, integrated with screen, controller printhead & ink cartridge
2. 2.8" large colour LCD with LED backlit screen for easy operation
3. Completely stand-alone, no PC required for operation
4. Remote control keypad for contact-less user-friendly operation
5. Plug-n-print ink cartridge design, no maintenance required
6. SD card slot design for easy software upgrades and data backup
7. Hot swap ink cartridge changeover system with built-in circuit safeguard
8. Auto ink identification to optimise printing quality
9. Quick start-up within a few seconds
10. System self-diagnostic reporting for easy troubleshooting
11. Real-time pop-up alert messages on screen
12. Dual-switchable nozzle design to double working lifetime of printhead
13. Built-in anti-shock mechanism to protect the printhead
14. Weighs only 0.49kg (1.08lb) without bracketry or ink cartridge
15. All-in-one price – no extra or hidden charges

### Software

1. Message-Pro software is supplied for free on the supplied SD card for easy creation, editing or backups of messages to PC
2. All user manuals supplied in Adobe Reader PDF format direct on the SD card
3. Multi-lingual user interface, includes support for English, Russian, Japanese, German, French, Italian, Spanish and Chinese
4. Software customisation available upon request

### Service Costs

1. DIY design for easy installation
2. No ongoing maintenance or service required
3. Messages are easily imported from one unit to another within minutes.
4. The Anser U2 is sold with a 12 month warranty (excluding consumer parts)

You can store up to 999 messages on the integrated SD card. The Anser U2 also comes supplied with a USB SD card reader so messages can be created, edited and backed up to/from a PC for ease of use.

The Anser U2 system also comes supplied with an infra-red remote control (in a protective plastic sleeve) meaning you can change print settings, create and edit messages or monitor ink usage without any direct contact with the U2 itself.

All essential bracketry and allen keys come supplied with the Anser U2. The bracketry includes an anti-shock mechanism providing you with print-head protection when printing onto different sized substrates at a close distance.

Euromark offer a selection of inks (supplied in 42ml cartridges) for the Anser U2 - suitable for a variety of substrates from porous cardboard to most plastic and non porous materials. A change in substrate only means a change in cartridge. The Anser U2 configures and optimises the cartridge usage on-the-fly meaning no downtime.
